

MAIN SCREEN

In addition to current blockbuster hits, Continental is proud to present a selection of popular films from the past two decades on flights with overhead screens. Our goal is to provide quality inflight entertainment appealing to a general audience. While the majority of our programming is edited for content, using the editing standards followed by most global airlines, as provided by the film studios, they may contain material not suitable for everyone. Parental guidance and viewer discretion are recommended. Additionally, R-rated programming (including airline edited versions) will not be shown on aircraft with overhead screens.
