

Andreas Wolf

Head of Powertrain, Continental
(since October 2018)

Andreas Wolf became the head of the Powertrain division on October 1, 2018. Previously, he was in charge of the Body and Security business unit in the Interior division. Under his leadership, this business unit has trebled its sales, exceeded its break-even point and continually achieves attractive profit margins. Furthermore, he was involved in founding the recent joint venture with Osram and was responsible for the carve-out of Continental's part of the business. Mr. Wolf has more than 25 years' experience in the automotive electronics industry.

Andreas Wolf studied business administration at Friedrich-Alexander University in Erlangen-Nuremberg, Germany, where he earned a Master's degree in business administration in 1989. Afterwards, he joined Siemens AG in Regensburg, Germany, as group leader for product disposition for the electronic plant Siemens Automobiltechnik, the former automotive branch of Siemens AG. In April 1993, he moved to France with his family to work for Siemens Automotive S.A. Toulouse, France. Here he took on the role of head of controlling for Chassis Systems worldwide.

In 1996, Mr. Wolf was promoted to head of the logistics department for the Siemens Automobiltechnik electronic plant in Regensburg, Germany. A few years later, Mr. Wolf took on an additional role as head of controlling and head of logistics. In January 2000, Mr. Wolf was appointed to the role of CFO for Siemens VDO's Diesel Systems business in Regensburg, Germany. In early 2004, he became the CFO of the Siemens VDO Interior & Infotainment business. With the acquisition of Siemens VDO by Continental AG in 2007, Mr. Wolf was promoted to head the Body & Security business unit.
